

RoHS Compliant Product
A suffix of "-C" specifies halogen or lead -free

DESCRIPTION

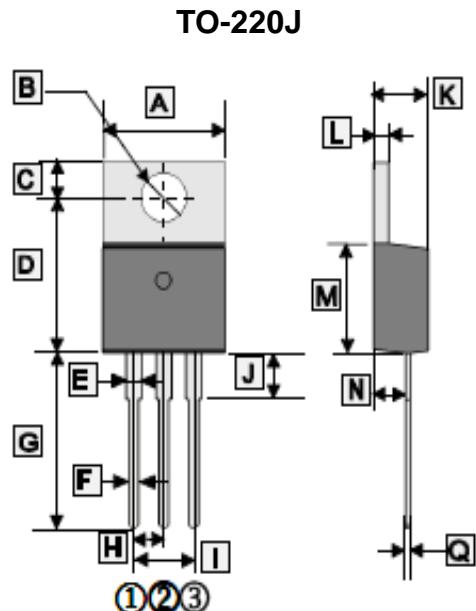

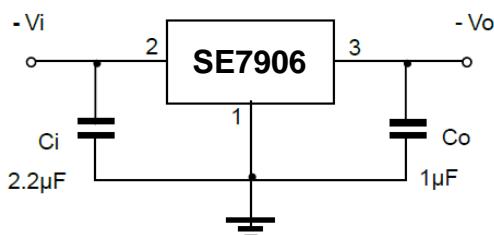

The SE7906 is a fixed-voltage monolithic integrated-circuit voltage regulators designed to complement.

The SE7906 is a wide range of applications. These applications include on-card regulation for elimination of noise and distribution problems associated with single-point regulation. The internal current limiting and thermal shutdown features of these regulators make them essentially immune to overload. In addition to use as fixed-voltage regulators, these devices can be used with external components to obtain adjustable output voltage and current and also as the power pass element in precision regulators.

FEATURES

- 1.5A Output Current
- Internal Short-Circuit Current Limiting
- Output Transistor Safe-Area Compensation
- No External Components
- Internal Thermal Overload Protection

TYPICAL APPLICATION

REF.	Millimeter		REF.	Millimeter	
	Min.	Max.		Min.	Max.
A	9.57	10.57	I	4.68	5.48
B	3.54	4.14	J	2.95	3.96
C	2.54	2.94	K	4.27	4.87
